Road construction & related businesses: we want you on our list!

SALEM – ODOT is compiling a list of companies interested in working on road, highway and bridge projects. This includes any construction, engineering and design, trucking, and materials supply on highway, road, bridge and related projects for both state and local governments. The list, being compiled in May and June through phone surveys and an online survey, will serve as a resource for the department's update to its disparity study.

Businesses have two options for participating:

1. Customer Research International (CRI) will collect information about the business through surveys via telephone.
2. Businesses can provide information about their firms through an online survey. (Takes about 10 minutes to complete.)

The 2016 Disparity Study will help the department operate the Federal Disadvantaged Business Enterprise Program for its federally-funded contracts.

For more details, please visit the project website at www.ODOTDBEstudy.org.
